

THE COMMISSION OF FINE ARTS

ESTABLISHED BY CONGRESS 17 MAY 1910

NATIONAL BUILDING MUSEUM
401 F STREET, N.W., SUITE 312
WASHINGTON, D.C. 20001-2728

202-504-2200
202-504-2195 FAX

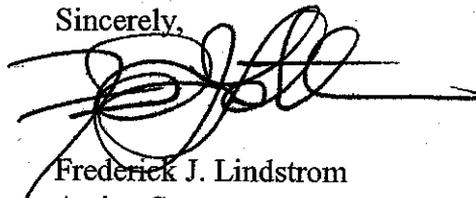

25 June 2004

Dear Mr. D'Amico:

During its 17 June 2004 meeting, the Commission of Fine Arts reviewed the plans for the new Hospital Energy Plant at Walter Reed Army Medical Center and approved the plans with a recommendation to modify the texture and scoring of the exterior concrete walls. The members felt that the scoring lines on the concrete walls, as depicted in the submission materials, had the unfortunate appearance of applied panels. They suggested that the score lines be eliminated and that the concrete walls be textured to look similar to stucco. This will impart a more traditional look to the facility's elevations, which is desirable, particularly when its proximity to the historic Building #1 is considered.

In addition, the Commission encourages the center to install the terrace level landscape enhancements as soon as possible. This will be the key in creating an inviting place for the hospital staff, visitors and patients to enjoy.

Sincerely,

Frederick J. Lindstrom
Acting Secretary

Michael A. D'Amico
Director of Public Works and Transportation
Walter Reed Army Medical Center
Department of the Army
Washington, DC 20307-5001
