

The map image showing the property location in Georgetown at 3072 Q street NW.

A photograph of the entire house with arrow to indicate which door will receive a new security door

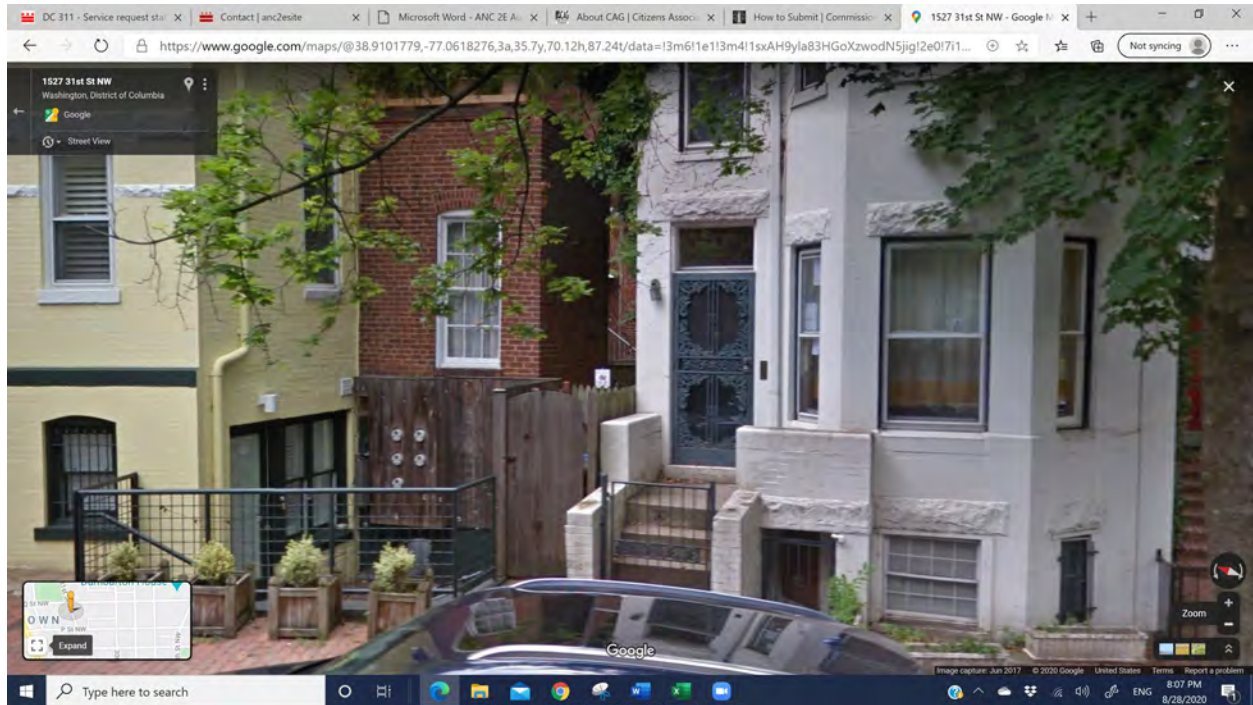

A close-up photograph of the door in question.

This is the image of the original Georgetown door that if approved will be restored to its original glory and installed. After installation it will look exactly like this (it is also Georgetown house the copy of ours!):

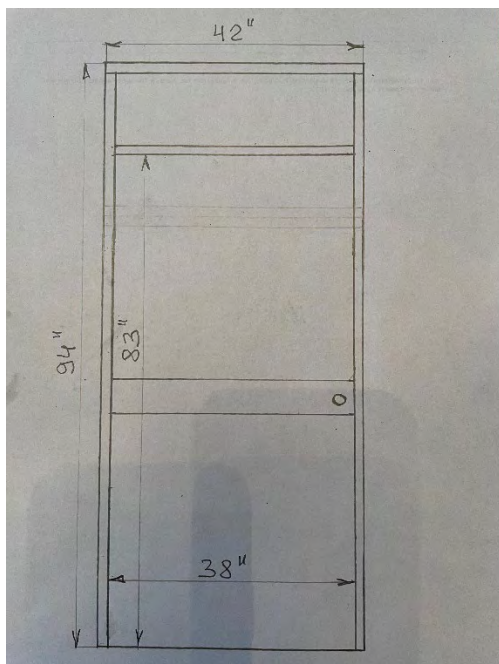

Dimensions of the door: 83" x 38"

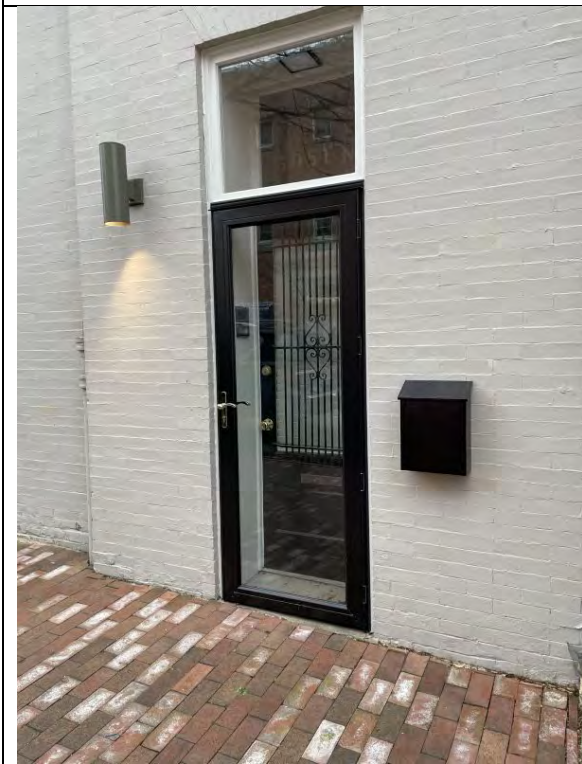

Material: Wrought iron

Color: Black

To visualize the final look, you can check the picture above. This is what inspired me, and it will look exactly the same.

I also found EXACT set of three townhouses as we have and all three have security doors. They are located at 1400 block of 21 street NW.
