COMMENTS FROM OGB MEMBERS WHICH HAVE BEEN INCORPORATED INTO THE CURRENT DESIGN

- THE 5TH FLOOR COLOR IS LIGHTER
- WE HAVE INCORPORATED THE BAY DESIGN CONCEPT SHOWN ON THE SKETCH ON THE BOTTOM RIGHT QUADRANT OF SHEET A-04 (TWO WINDOWS WIDE).
- EXTEND THE BRICK RUSTICATION, WHICH PREVIOUSLY WAS ONLY SHOWN AT THE EAST PORTION OF THE FACADE.
- PROCEED WITH THE RED BRICK FACADE OPTION.
- ON SHEET A-29, WE CHOSE THE RED BRICK OPTION, BUT SELECTED A DARKER GRAY BRICK FOR LESS CONTRAST.
- THE BAYS ARE CURRENTLY DRAWN 2' WIDER THAN THE SPACE BETWEEN BAYS.
- THE BRICK RUSTICATION WILL BE SET BACK AT LEAST 1".
- GARAGE DOOR HEIGHT REDUCED TO 14', AND THE WIDTH WAS REDUCED FROM 18'-0" TO 12'-0".
- WE WILL LIMIT THE "RANGE" OF THE RED BRICK BECAUSE OTHERWISE IT WILL DIMISH THE EFFECT OF THE RUSTICATION.
- THE TREATMENT OF THE GARAGE DOOR HAS BEEN REFINED.
- BAY BRICK TO BE THE SAME COLOR AS THE MAIN BUILDING BRICK BEHIND IT.
- THE SECTION ON SHEET A-25 WAS CORRECTED TO ASSURE ADEQUATE TRUCK TURNING ABILITY.
- ESTABLISH A BASE ACROSS THE FACADE.
- THE HEIGHT OF THE WINDOWS IN THE BAYS ARE NOW THE SAME AS THE OTHER WINDOWS.
